

# Bug Bounty Assessment Report - google.com

Target	google.com
Assessment Date	2026-01-04 14:49:33
Total Vulnerabilities	6
Risk Score	24

## Vulnerability Summary:

Critical: 0

High: 0

Medium: 6

Low: 0

Total: 6

## Security Recommendations:

### Cross-Site Request Forgery (CSRF) (MEDIUM)

Recommendation: Review CSRF protection implementation.

Implementation: Generate unique CSRF tokens per session and validate them on all state-changing requests.

### Network Service - HTTP (MEDIUM)

Recommendation: Review and implement appropriate security measures.

Implementation: Follow security best practices for the specific vulnerability type.

### Network Service - HTTPS (MEDIUM)

Recommendation: Review and implement appropriate security measures.

Implementation: Follow security best practices for the specific vulnerability type.

### Missing Security Header (MEDIUM)

Recommendation: Review and implement appropriate security measures.

Implementation: Follow security best practices for the specific vulnerability type.
